

# PUBLIC NOTICE

From February – April 2016, ATCO Gas is conducting work within Fish Creek Provincial Park as part of the Urban Pipeline Replacement Program.

## Project Details:

- A low-pressure natural gas line approximately 2.6km in length to be installed
- Work area to be restored to the same condition as it was prior to start of project
- Restoration to take place in summer 2016 and to include a new paved pathway connecting the Park to 146 Ave. along Bow Bottom Trail
- Contractors will be on site conducting work on behalf of ATCO Gas

## Potential Impacts:

- Entrance to Park temporarily narrowed along Bow Bottom Trail
- Some bike and pedestrian pathways will be detoured or temporarily restricted
- Open and accessible excavations will be supervised or fenced and/or barricaded

## The Urban Pipeline Replacement Program

- Replaces and relocates vintage high-pressure natural gas pipelines in Calgary and Edmonton
- Improves public safety, modernizes the natural gas network and adds the capacity needed to meet growing demand for natural gas

**For your safety, please obey all posted detour  
and warning information signs.**
