PHASE 4 BRICKS ARE GOING FAST!

LEAVE A LASTING LEGACY AND SHOW YOUR SUPPORT FOR FISH CREEK PROVINCIAL PARK!

There are fewer than 25 bricks available in the fourth and final phase of the Friends Brick Pathway. This program began in 2017 to commemorate the 25th Anniversary of the Friends of Fish Creek. You may have seen these bricks in front of the Cookhouse at the Bow Valley Ranch in Fish Creek Provincial Park, or dedicated one yourself. If you did not get a chance to dedicate a brick, now is a great time to dedicate one of the remaining bricks. Bricks are only \$250 each and you will receive a valuable tax receipt for your donation. A brick would also make an amazing gift for anyone who enjoys visiting Fish Creek Provincial Park and would like to see it protected and preserved.

For more information, please contact the Friends of Fish Creek at 403-238-3841 ext. 1 or visit

<https://friendsoffishcreek.org/brick>

FISH CREEK SPEAKER SERIES

THANK YOU SERVUS CREDIT UNION

The Friends would like to extend our sincere thanks to Servus Credit Union in Bridlewood for providing funding for the Fish Creek Speaker Series program. This sponsorship marks the first time that this long running series has received funding, and the support received from Servus will help with promotional activities and other program expenses. In light of the current pandemic, the Friends have begun exploring video conferencing technology in order to reach our members and deliver Fish Creek Speaker Series presentations. Thank you again to Servus and we are looking forward to another amazing Fish Creek Speaker Series program.

**Invasive Alien Plants – Practices That Lead to Prevention**

Thursday, May 21, 2020 7:00 pm - 8:00 pm

Presented by Presented by Andrea Eastham,
Alberta Invasive Species Council Volunteer

Invasive plant species may look appealing and even have useful qualities on the surface, but when introduced to a new environment, they have the potential to disperse and take over. Without predatory species to combat invasive species, they will alter vegetation, wildlife, and the natural beauty of native ecosystems. Invasive alien plants, both terrestrial and aquatic, are recognized worldwide as one of the major threats to biodiversity second only to urbanization. Yellow flag iris, photo courtesy of Andrea Eastham

Starting in January 2019, the Fish Creek Speaker Series admission fee has increased from \$5.00 to \$10.00.

Friends of Fish Creek members will continue to receive free admission. Youth 16 years of age or younger can attend free of charge, but must be accompanied by a registered adult. Registration is required. For information about upcoming presentations please stay tuned to

<https://friendsoffishcreek.org/programs/speaker-series/>

A NEW KIND OF DONATION EXPERIENCE

The Friends have adopted a new CRM (Customer Relationship Management) system entitled Kindful to record donations, take payments and register people for programs. In addition to organizing and keeping track of donors, members, sponsors and other contacts, this new system enables us to efficiently issue and email tax receipts for contributions. We have begun integrating Kindful with both program registration and donation pages on our website. Please feel free to contact us if you have any questions or concerns, at 403-238-3841 ext. 1 or info@friendsoffishcreek.org.

QUIZ QUESTION

Which member of the park's wildlife community has a very distinct appearance and a powerful defense mechanism?

The correct answers will be announced in the next issue of Voice of the Friends.

A MESSAGE FROM YOUR FRIENDS

The Covid-19 pandemic has presented us all with life-changing challenges as the world as we know it has been flipped upside down. The Friends of Fish Creek would like to express our sincere thanks to all of the first-responders, medical staff, health care workers, government officials, store clerks, transport personnel, other essential service providers, and everyone on the front lines, who have been working so hard during this crisis.

For a community-focused people organization like the Friends of Fish Creek, the pandemic quickly and significantly changed our daily operations, including the planning of program and event delivery. We are fortunate to have Fish Creek Provincial Park as part of our city, and the Friends greatly appreciate our role in helping you, the community member, to stay connected to us and to the park we all love. During this challenging and uncertain time, we will strive to keep you informed about our operations and how we are moving forward.

Although this situation is far from ideal, it has presented opportunities for personal and professional development, and taught us new ways of reaching out, connecting with others, expressing ourselves, and strengthening our ties as a community.

Our staff is mainly working from home and the office is being used occasionally by one staff member present at a time in order to adhere to physical distancing guidelines. It is because of our excellent IT support that we can work remotely, access our network, and keep in touch with volunteers, members, supporters and other community members.

Our diverse funding sources and the continuous support of community members have enabled us to maintain our full staff and continue with daily operations. Fiscal responsibility by our administration staff and Board of Directors in recent years have prepared us for the

financial challenges and economic disruption caused by Covid-19.

While we have cancelled some programs, others are going ahead, such as the annual Photography Contest (see page 5). In April we started using Zoom Video Conferencing technology to host meetings, deliver programs like the Fish Creek Speaker Series “Energize with Grizzlies” presentation, Take a Calm Break free meditation session, and the Annual General Meeting. Thank you to everyone who joined us on these sessions.

We have also reached out to community members through regular email communications to raise awareness about local businesses who have supported us in the past. This is a new approach for the Friends and one way we can give back to the Fish Creek community and help support the local economy.

These times are challenging for everyone and taking care of your physical, mental, spiritual and emotional health are essential to helping alleviate stress and boosting immunity. The Friends encourage you to exercise within your home and outside if possible - while maintaining a safe physical distance. Now is a great time to visit Fish Creek Provincial Park and take advantage of the endless trails and pathways here. Please note that vehicle access to the park is not permitted in certain areas and all facilities – including washrooms – are temporarily closed in the interest of public health and safety.

Thank you to everyone who is staying home as much as possible to help keep us all safe. The Friends continue to plan this year’s programs and events so that we will be prepared to run them when it is deemed safe to do so.

We wish you and your families the best of health and look forward to a time when we can open our doors and welcome you back to the Cookhouse!

Alberta Environment and Parks Messaging -

WE FOUND A STEWARDSHIP TRUCK!

PLEASE CONSIDER SUPPORTING ONGOING COSTS

In the fall, we told you about our need to find a truck to carry out our stewardship projects. We now have a truck and are so grateful for the support we received!

Although we were heartened and grateful by these offers, unfortunately neither of these trucks fit our needs.

As we all know, it's dry in southern

A truck is essential for our restoration and stewardship projects in this park. Many of our Watershed Stewardship Programs like Riparian Restoration and Tree Wrapping require the use of a vehicle to haul equipment and supplies to and from work sites.

Up until recently, we have relied on Alberta Parks vehicle use and staff for transportation of tools, equipment, watering and other tasks. This support may not be available in the future and securing our own vehicle has ensured that we are now able to continue our stewardship work in the park.

Thank you to everyone who donated to the truck campaign! We have surpassed our goal of \$10,000 and have now raised over \$10,260! Special thanks to Starbucks Canada Charitable Fund, held at Vancouver Foundation, for their generous contribution towards our goal.

So many community members showed their support by donating, and two families even stepped forward to donate a truck!

Alberta, so it is essential that we water our newly-planted trees and shrubs in our restoration sites. Therefore, we needed a truck that could haul a full water tank, watering equipment and people. And water is heavy, so a big truck with a big payload was necessary.

In February, a member of the Fish Creek community, the owner of Calgary-based In-Line Pigging Solutions, saw a poster about our need and decided to donate the truck. Through his generous donation, we now have a Dodge Ram 5500 with a crew cab and a flatbed. Although this truck might be a touch heavier duty than necessary, it certainly will do the trick, and the crane might come in handy for loading our water tank, rolls of wire and other heavy equipment!

To In-Line Pigging Solutions and to everyone who contributed, we extend our sincere thanks. For those who have not yet donated, please consider making a donation to support ongoing vehicle costs, such as insurance premiums, maintenance and fuel.

Donating to this important project is now easier than ever. You can donate online at <https://friendsoffishcreek.org/programs/truck/>, call the office at 403-238-3841 ext. 1, drop by the Cookhouse or mail in a cheque to Friends of Fish Creek, ATTN: Truck Campaign, PO Box 2780 Stn M, Calgary AB T2P 2M7

WELCOME TO THE TEAM EMMA!

The Friends are pleased to welcome Emma Stroud as our Citizen Science & Stewardship Coordinator. Emma belongs to the small percentage of the population who has lived in Calgary her whole life. In fact, her family has called Calgary home for four generations and if you ever

find yourself taking a walk in Bowmont Park, you may come across a sign marking the original family homestead that has been restored as a natural park.

Emma loves the rich history of Calgary, and currently resides in the historic neighborhood of Ramsay, which is ideally situated between the Bow and Elbow Rivers, the Inglewood Bird Sanctuary, and perhaps most importantly, six local breweries.

Emma is a graduate of the Ecology program at the University of Calgary, where she focused much of her research in aquatic ecology. She also spent summers volunteering in fisheries research and restoration, taking field courses in Kananaskis and Bamfield, and travelling through Alberta and BC to find the best swimming spots. Being an ocean lover from an early age with a peculiar obsession with sharks, she has widened her breadth of interests to include the rich diversity of Alberta's resident fish species, riparian restoration and urban conservation. Spending the last year working in consulting as a fisheries technician, she is incredibly excited to switch gears and spend the next chapter in the city she loves, near so many vibrant aquatic ecosystems.

While you may have seen Emma volunteering at restoration fieldwork days in the park over the past few years, she is looking forward to meeting all the hard-working volunteers and park lovers, at a safe 6 foot distance for now, of course!

CAPTURE NATURE PHOTO CONTEST – MAY 1 TO JULY 31

The Capture Nature Photo Contest as a creative way of enjoying the beauty and inspiration of Fish Creek Provincial Park. It's a good-spirited competition for all ages and levels of photography, and a great excuse to visit the park on a regular basis. This year's themes are A Bug's Eye View, Power & Grace, and Weather or Not. We know the themes are a bit challenging, and we hope they will encourage you to look at and connect with the park in a different way.

All photos must be taken in Fish Creek Provincial Park and can be submitted at any point during the contest, but the earlier the better! The public will be able to vote for their favourite photos through our online gallery, so early submissions will have more time to collect votes!

Are you up for the challenge?

[Visit the Friends' website](#) for contest fees and info, to find out prize details, contest rules and regulations, and to register! Many thanks to our contest sponsors for their generous donations of contest prizes: [MEC](#), [RMB Photography](#) and [Vistek](#).

SHAW BIRDIES FOR KIDS PRESENTED BY ALTALINK

**SUPPORT OUTDOOR
EDUCATION IN FISH
CREEK AND YOUR
DONATION WILL
BE MATCHED
UP TO 50%!**

**SHAW BIRDIES
FOR KIDS
PRESENTED BY
ALTALINK**

Shaw Birdies for Kids presented by AltaLink (BFK) is a truly amazing program that helps to raise funds for children throughout Alberta. BFK runs in conjunction with the Shaw Charity Classic, taking place August 24 – 30 at Canyon Meadows Golf & Country Club. Through BFK your donation will be matched up to 50% and your contribution can go even further.

We are very grateful that the Friends of Fish Creek and our Learning Naturally program has once again been chosen as one of more than 200 Alberta charities to participate in Birdies for Kids this year. Our goal this year is to raise \$20,000, in order to provide 2000 students between grades K-6 with an outdoor educational field trip in Fish Creek Provincial Park. We have a variety of ways for you to support unforgettable learning opportunities for children in Calgary.

Birdies for Kids will support the Friends' Learning

Naturally program, which includes TD Learning Naturally. TD Learning Naturally helps provide over 4700 children each year with a life-changing field trip to Fish Creek Provincial Park. Students in the TD Learning Naturally program attend economically disadvantaged schools in Calgary and may not have the opportunity to visit Fish Creek were it not for Learning Naturally. This essential program does not receive regular funding and we rely on ongoing donations from community members and organizations.

Please donate before August 30 to support Learning Naturally and your donation will be matched up to 50% by the Shaw Charity Classic Foundation. Please talk to your friends, family members and even your employer about contributing this year. To donate or for more information contact the Friends or visit <https://friendsoffishcreek.org/event/birdies>

PARK PROTECTORS NEEDED - HELP PROTECT AND PRESERVE FISH CREEK PROVINCIAL PARK

As a Park Protector - you never have to worry about keeping your donations up-to-date and you will get just one tax receipt a year. You can increase or decrease your support, put it on hold for a few months or cancel at any time. You will receive monthly updates on Friends activities so you can keep up with the good work your donations are supporting! For more information please visit <https://friendsoffishcreek.org/park-protector-signup>

VOLUNTEER IN PROFILE

JENNIFER SOLEM - COMMITTED TO CONSERVATION

Jennifer Solem has been volunteering with the Friends of Fish Creek for over seven years, and members and volunteers have most likely seen her at a variety of programs and events. In recognition of her support, the Friends were pleased to present Jennifer with the Community Champion Volunteer award.

Originally from Saskatoon, she worked in the pharmaceutical industry before raising a family. In recent years she has enjoyed being a grandparent and volunteer.

With the Friends of Fish Creek Jennifer has lent her expertise and abilities to a great many programs, courses and events, including Creekfest, Kids Bird Camp, Birding Course, Youth Nature programs, Invasive Species removal, Restoration and Good Grief, just to name few.

When asked why she started volunteering, Jennifer replied, "to give back, and because I could. The Friends of Fish Creek makes it so easy, the volunteer tasks are always interesting, enjoyable, and worthwhile."

Jennifer discovered the Friends of Fish Creek after participating in the popular Birding Course. "I saw the Friends' Birding Course advertised in a community newsletter. I signed up in order to strengthen a New Year's resolution to get out walking in the park more." Through the Birding Course, she was able to explore new areas of the park. "Fish Creek is a big place, and I was delighted to start learning not only about birds but also discovering other local parks and natural areas."

"I started getting news about volunteer opportunities through the Friends," she said. "I stepped up to help lead Birding Courses after a few years as a participant because they needed people and I was there anyways. Fish Creek is very welcoming to its volunteers."

"One of my most rewarding volunteer activities is helping with the bird groups," she said, "for the

inspiration of its founding instructors, the enthusiasm of the participants, the collegiality of fellow leaders, the support of Friends staff, and the sheer joy of being out there walking, listening, and noticing nature."

"Watching the Friends practice good environmental stewardship at all their events has made me more conscious of my own choices," she stated. Through volunteering with the Friends, Jennifer discovered other opportunities to appreciate nature. "Meeting Gus Yaki through the Friends' Birding Courses led to joining his walk across southern Alberta in 2017 to raise funds and awareness for bird research and habitat conservation," she said, "It was a truly amazing experience!"

"Balancing public engagement and conservation mandates, so people can experience nature first hand without loving our park 'to death' will continue to be a challenge for the Friends," Jennifer said, "Riparian restoration projects are one example of this. The Friends has a role in raising awareness about responsible use of the park. Working to keep invasive non-native plants out of the ATCO Heritage Grassland area is another example of trying to preserve and restore an ecosystem under pressure from the immediate surrounding area."

To the readers of this newsletter, Jennifer shared "Find the nearest park entrance and get out there and enjoy it! And if you are at all interested, do talk to the Friends of Fish Creek about volunteering your time or resources."

Thank you for all your hard work Jennifer.

LEARNING NATURALLY IN FISH CREEK!

Sponsored by TD Friends of the Environment, **TD Learning Naturally school programs** bring students from economically-disadvantaged schools to the park to learn about nature, history and to connect with each other outdoors since 2009. [Visit our website to learn more.](#)

Building on our Learning Naturally school programs, we've been expanding the opportunities for youth and families to connect with nature and now offer five different Learning Naturally programs!

New this year, we were looking forward to inviting families down to the park for free **Family Nature Nights**, where guests could learn about animal tracks and facts, enjoy a storybook, roast a marshmallow and explore nature through hands-on activities.

Due to current restrictions in place to safeguard public health, we've had to put these events on hold.

We are staying informed of the ever-changing situation and working to develop strategies to keep everyone safe so we can respond rapidly once it is safe to begin hosting public events once again.

We are hopeful that life will return to a new normal in the near future and we look forward to engaging families and youth into the future.

Thank you our supporters, TD Friends of the Environment Foundation, Harry & Martha Cohen Foundation and Staples, McKenzie Towne.

WELLNESS IN FISH CREEK PROVINCIAL PARK

Since 2013, the Friends have been offering Wellness Program as a way of supporting health and well-being through outdoor programming in the park. While the program looks a bit different each year, we strive to offer high-quality experiences that meet the needs and interests of the community, with the added benefit of connecting people to nature.

Due to the coronavirus, this year's wellness programs may end up looking quite different from previous years! For example, we have already hosted our first online meditation session. We are working hard behind the scenes to develop new ways to foster wellbeing in our community, while respecting social distancing requirements, so please stay tuned to [our website](#) in the coming weeks for more information. We hope you will join us!

COMMUNITY SUPPORTERS

THANK YOU LOCAL AND INTERNATIONAL SUPPORTERS

The Friends of Fish Creek are very grateful to all donors, sponsors, and granting organizations for supporting our programs. It is evident that there is a large amount of support within the community and the organizations below share our vision of a sustainable Fish Creek Provincial Park that improves the quality of life for current and future generations. We would like to extend our sincere thanks to the following organizations.

WRRP – The Watershed Resiliency and Restoration Program is provided by Alberta Environment and it has supported our ReWilding through Restoration environmental stewardship activities. Last fall we worked with volunteers to reduce the impact of park visitors on the riparian areas along the creek by installing fencing and signage, planting willows and other restoration activities, in order to reclaim and restore these sensitive areas.

LSC – Through the Watershed Stewardship Grant, funded by Alberta Environment and Parks, Land Stewardship Centre of Canada provided much needed funding for both the tree mapping project which began last year, as well as for the rock dam research project. The rock dam research project was conducted by a student who also delivered a Fish Creek Speaker Series presentation in October, and was featured in the Friends' and BRBC newsletter.

United Nations Association in Canada - The Canada Green Corps and Green Spaces programs provided funding which enabled us to hire a temporary part time staff in the position of Citizen Science & Stewardship Coordinator last year and at the beginning of this year.

BRBC – The Bow River Basin council is a long time partner and supporter of the Friends of Fish Creek and they recently provided funding for the Friends' Watershed Stewardship program, which includes activities and events like invasive species management, community outreach and restoration.

City of Calgary – The City of Calgary is supporting our ReWilding work in Fish Creek through a new grant, with projects to be completed in June. The Friends and The City continue to collaborate and find new ways to enhance our partnership for the benefit of this truly amazing natural area.

AREF – The Alberta Real Estate Foundation has supported the Friends for many years and in the beginning of 2020 they funded the publication of 2000 revised pocket maps. These pocket maps were designed by local company Twisted Ink Design & Advertising and are a wonderful way to share information not only about park locations but also about the Friends of Fish Creek.

Cont'd on next page

COMMUNITY SUPPORTERS CONT'D

Calgary Foundation – The Calgary Foundation is a long time supporter of the Friends of Fish Creek and recently helped to fund the Calgary Captured program in partnership with The City of Calgary and the Miistakis Institute. Wildlife movements in Fish Creek Provincial Park and in different parks within the city are recorded through hidden cameras and the images are shared online.

ATCO – ATCO Gas continues to support the Weed Whackers volunteer program and the ATCO Heritage Grassland at the Bow Valley Ranch. Their financial contribution is essential in helping the Friends manage invasive plant species and support the growth of native plant species.

4imprint Canada – Through their One by One Grant this international company provided the Friends with funding that we used for 45 branded enamel mugs. These beautiful and durable mugs will be used during volunteer activities and given out as volunteer appreciation gifts.

MPak Plastics – MPak Plastics generously contributed hundreds of garbage bags that the Friends can use for Weed Whackers and park clean ups.

HSBC Canada – Generously provided funds to purchase supplies and equipment for our long-running Park Watch Stewardship program in 2019 and we will continue to benefit from this contribution this year.

STEWARDSHIP MESSAGE

PLEASE DO NOT FEED THE BIRDS

Fish Creek Provincial Park is a natural refuge for a high diversity of bird species; in the midst of our bustling, growing city, it provides food, shelter and nesting grounds for these creatures, that would otherwise be difficult for them to find anywhere else in the area.

some people continue to do so, even if they know it is illegal.

Feeding birds, or any other wild animal, in a Provincial Park can contribute to habituation, meaning that they lose their fear of people. When wild animals lose this fear and

Over 200 bird species have been observed in the park in recent years, from those we are all familiar with – like the Red-winged Blackbird or Great Horned Owl – to many we are unlikely to have heard of before, such as a Cinnamon Teal, Double-crested Cormorant or Ruby-crowned Kinglet. Did you know that Peregrine Falcons have been seen in the park? Or that nine different species of Woodpecker have also been observed? Some stay here year round, while others use it as a place of rest during the spring and fall migration, which means that, as the seasons change, so do the opportunities to see something amazing!

With this in mind, it is no surprise that birding is one of the most popular recreational activities in Fish Creek Provincial Park, as many people take advantage of this natural asset and its ability to support so many wide-ranging species. It is common throughout the year – yes, even in the winter! – to see groups of people staring up at the treetops and sky, seeking out their latest find, kitted out with binoculars and cameras to help them better capture the experience. And while we know it is tempting to bring along bird seed to attract them closer, in order to get a better look, this is a prohibited activity in all of Alberta's Provincial Parks, including Fish Creek. Unfortunately, feeding birds has increasingly become a problem in the park, and

come to associate people with food, this puts everyone at risk. Animals can lose their natural drive to search for food, expecting it to come to them as hand outs, and this can impact their very survival. Bird seed left on the ground can also attract many other creatures who enjoy it, such as mice, deer and yes, even bears. It can attract animals to areas frequented by people, increasing the likelihood of an undesired animal-human interaction, or leading them nearer to pathways and roads where they can be injured.

We all need to remember that everything is connected, and that often times there are unanticipated consequences to our actions, even if our intentions are well-meaning. Birds have an incredible resource in the park, and need to be able to fend for themselves, letting nature take its course, in whatever way that looks. **So, please support us by being a good steward of the park, observe birds and other wildlife from a distance, and help to educate others who may not be aware of the harm they may be causing by feeding birds.**

We invite you to spend some time in the glorious spring sunshine, exploring the park and learning about birds. You can also use the [Fish Creek Provincial Park Bird Checklist](#) any time, to see what you can find!

QUIZ ANSWER - WINTER ISSUE

The Brick pathway was one of the Friends' 25th Anniversary projects organized in 2017. Can you name one of the other five Anniversary projects?

In 2017, the Friends celebrated our 25th year of bringing the community and the park together. Our office was renovated and now has a functional kitchen and entranceway, electrical, lights and window coverings (1), as well as new signage and an informative kiosk (2). Long time Friends supporter and local artist Jim Pescott painted an image of Fish Creek Provincial Park in his signature pointillism style and provided the Friends the rights to use the painting for awareness and fundraising (3). We worked with volunteers on a survey to better understand our role and to make improvements to meet the needs of the community (4). The rewilding streambank restoration program has become one of the Friends' most impactful volunteer activities (5). These projects helped the Friends to celebrate our first 25 years and set a good foundation for the next 25 years!
