

Beaver Tales Loop

Walk or wheel this 2 km paved loop to learn about some wild residents of the Fish Creek valley and to see how the Friends of Fish Creek are working to share habitat with them.

The Friends of Fish Creek are working with Alberta Environment and Parks to foster coexistence with beavers in Fish Creek Provincial Park.

On this interpretive trail you will get a chance to learn how beavers benefit the ecosystem and see some beaver coexistence devices designed to manage water levels in an active beaver habitat.
